

OMNIA SURGICAL ACCESSORIES

Hu-Friedy, Omnia and Crosstex are now proud members of

 **HuFriedyGroup**
The Best In Practice

SHEATHS WITH ELASTIC FIXING BANDS

Disposable sterile protective sheaths to be used for tube covering during implant and piezoelectric surgery operations. The package includes the latex-free elastic bands. The sheaths are available in 2 sizes.

CODE	DESCRIPTION
12.U0004.00	Sheath, 120x7 cm, with fixing elastics in PE
12.U0006.00	Sheath, 240x7 cm, with fixing elastics in PE

SHEATHS WITH FIXING ADHESIVES

Disposable sterile protective sheaths to be used for tube covering during implant and piezoelectric surgery operations. The package includes the adhesive tape. The sheaths are available in 2 sizes.

CODE	DESCRIPTION
12.U0008.00	Sheath, 120x7 cm, with fixing adhesives in PE
12.U0009.00	Sheath, 240x7 cm, with fixing adhesives in PE

OMNISLEEVE SHEATHS WITH INSERTER

Omnisleeve is a sheath with cardboard inserter that enables the assistant to unroll the sheath without touching the tube, so as to preserve the sterility of the sheath. The package includes the elastic bands.

CODE	DESCRIPTION
22.U0005.00	Omnisleeve Sheath, 120x7,5 cm, with inserter in PE
22.U0007.00	Omnisleeve Sheath, 240x7,5 cm, with inserter in PE

BARRIER SLEEVES

CODE	DESCRIPTION	QTY
22.Z0601.00	Handpiece Cover Mod. Penguin - Sterile	25/Box
22.Z0600.00	Handpiece Cover Mod. OSstel - Sterile	25/Box

MEDICAL ADHESIVE TAPES

Medical adhesive tape is useful in order to secure drapes and tubes and keep the working environment sterile and safe. This tape is available in white, is made of non-woven fabric and is easy to apply. It is packed in easy-to-open transparent blisters.

CODE	DESCRIPTION
12.U0014.00	Medical adhesive tape 10x5 cm for sheaths and drapes fixing
12.U0016.00	Medical adhesive tape 10x50 cm for sheaths and drapes fixing

12.U0016.00

PACK
OF 50

ICEBERG® INSTANT ICE PACKS

Iceberg® is an instant ice pack, which is extremely practical and easy-to-use, and does not need to be specially chilled. Instant activation is obtained by simply squeezing the pack with both hands. It is made of soft non-woven fabric, a material that remains soft and adapts to the part of the body needing relief. Mixture of nitrogenous salts and water (in compliance with Reg. CE 1907/2006 and updatings)

ADVANTAGES:

- **Ready-to-use**
- **Instantaneous**
- **Automatically activated by simple pressure**
- **Ideal for use on the face;** it provides relief of pain and swelling after a dental treatment.

CODE	DESCRIPTION
30.V0001.00	Iceberg® instant ice pack in NWF envelope. NWF + Plastic composite material

PACK
OF 25

DECONTAMINATION CARPET

Omnia decontamination carpets were manufactured using a special formula glue that removes bacteria from the soles of your patients and deactivates them. They are made up of 30 individually-numbered layers of adhesive film, and have an adhesive fixing band on the lower side for application either on the floor or removable base.

CODE	DESCRIPTION	QTY
30.V1000.00	Omnia base flex with decontaminating carpet (15 leaves demo) cm 50x100	1/Box
30.V1001.00	Light recharge for decontaminating carpet (4 blocks of 30 sheets) cm 45x95	1/Box
30.V1002.00	Save recharge for decontaminating carpet (8 blocks of 30 sheets) cm 45x95	1/Box

Omnia base FLEX can be personalized with your logo. Send us your logo in .JPG format and you will receive your customized mat.

Base Flex with Omnia logo and decontaminating mat (15 sheets)

Recharge for decontaminating mat (30 sheets) **with adhesive fixing bands**

SOFT TISSUE PUNCH

The soft tissue punch or mucosal punch for soft tissues is an instrument, which is used to precisely incise the mucosal edge around the diameter of the implant. Omnia offers scalpels with 3 different diameters; the three sizes allow easier fitting to the main implants available for sale. The disposable circular scalpel causes less mucosal trauma than traditional scalpels, since the incision is limited to the dimensions of the implant cap.

**PACK
OF 5**

CODE	DESCRIPTION
32.Z2020.00	Soft tissue punch Ø 4.1 in Medical steel
32.Z2022.00	Soft tissue punch Ø 5.2 in Medical steel
32.Z2024.00	Soft tissue punch Ø 6.2 in Medical steel

DISPOSAL BAG FOR CONTAMINATED MATERIAL

The bag for contaminated material is a disposable product that allows safe handling of contaminated material. It is ideal for use in laboratories and for handling waste in hospital wards. The bag for contaminated material has an adhesive strip for rapid fixing to a Mayo table or any other surface, so as to prevent the spread of infectious material, such as membranes, used gauzes or extraction elements.

SUNDRY ACCESSORIES

The transparent cover with self-adhesive side allows the operator to cover the Physiodispenser or control unit, and still be able to change work programmes and monitor the indications on the display while preserving sterility during the operation.

CODE	DESCRIPTION	QTY
32.U0050.00	Tablet protection bag with adhesive closing - 23x19 cm - Sterile - packed individually in PVC	25/Box
12.A3012.00	Transparent bag, 67x75 cm, with sliding strings for Physiodispenser or control unit in PVC	12/Box
12.A3119.00	Transparent cover, 40 x50 cm, with self-adhesive side for Physiodispenser or control unit in PVC	20/Box

The transparent incision drape in PVC, which is resistant and adjustable, is used to create a sterile working environment all around the incision site. The drape sticks close to the lips of the wound, thus protecting the wound from the bacteria that may migrate from the sides, since it remains firmly positioned also for the whole duration of important operations.

CODE	DESCRIPTION	QTY
32.Z0000.00	Transparent incision drape, 15x20 cm in PVC	10/Box

CODE	DESCRIPTION	QTY
12.C1008.00	100 blisters with 1 sterile hand towel, 34x37 cm	10/Box
12.C1014.00	10 blisters with 2 sterile hand towels, 34x37 cm	12/Box

32.Z0000.00

12.C1008.00

12.C1014.00

2CROSS20 ADHESIVE FILM

2CROSS20 is an adhesive film that is used to cover control panels, handles, switches and all the operational surfaces, which may be touched during surgical procedures, so as to avoid cross-contamination.

CODE	DESCRIPTION	QTY
32.U0020.00	10 sterile blisters with 5 2CROSS20 adhesive films 20 x20 cm, light blue, in LDPE	50/Box
32.U0060.00	20 sterile blisters with 2 adhesive films 17 X26 cm. Ideal for Ipad cover, transparent, in LDPE	40/Box

32.U0020.00

CLEANSING, DISINFECTION AND BANDAGING

Bacteria and other micro-organisms can be transmitted through the hands, since hands come daily in contact with persons, food, clothes, working surfaces and any sort of objects. As a consequence, hands need to be cleaned and disinfected.

Hand cleaning is aimed at:

- Remove residues, natural oils, creams and other micro-organisms from the hands and forearms
- Reduce the number of micro-organisms on the skin
- Prevent the growth of micro-organism population during the operation
- Prevent the risk of contamination between the skin flora and the surgical environment

An aseptic cleaning of hands is obtained through the use of mechanical and chemical processes to control the two types of organisms that are present in the skin. The two types of organisms that are present in the skin are: resident or in-transit. People acquire in-transit micro-organisms through direct contact. These micro-organisms usually attack the skin. During aseptic cleaning of the hands, scrubbing with a brush removes most of in-transit micro-organisms. Resident micro-organisms are the bacterial flora of the skin, hair follicles, sebaceous glands and sudoriferous glands. These micro-organisms stick to the skin and are resistant to mechanical removal. During aseptic cleaning of the hands, the chemical action of antimicrobial and antiseptic substances reduces and neutralizes resident microbial flora.

DISPOSABLE STERILE SCRUB BRUSH FOR NAILS AND HANDS THAT IS SUITABLE FOR NAIL AND HAND CLEANING BEFORE SURGICAL OPERATIONS

CODE	DESCRIPTION
32.Z0500.00	Tecnoscrub disposable sterile scrub brush for nails and hands, with nail cleaner to clean the subungual area
32.Z0501.00	Tecnoscrub disposable sterile scrub brush for nails and hands with 4% chlorhexidine gluconate disinfectant and nail cleaner to clean the subungual area
32.Z0502.00	Tecnoscrub disposable sterile scrub brush for nails and hands with 7.5% iodine disinfectant and nail cleaner to clean the subungual area

CODE	DESCRIPTION	QTY
30.Z0400.00	Bowl 250 ml + sponge for patient disinfection	10/Box

CODE	DESCRIPTION	QTY
32.Z1101.00	Sterile gauzes 25x16 cm in 20 packs of 5 units each (cotton)	20/Box
30.Z2010.00	Folded compresses 5x5 cm, 4-ply, non-sterile, in NWF	600/Box
30.Z2011.00	Folded gauzes 5x5 cm, 8-ply, non-sterile in cotton	600/Box
